

NH LAKES 2008 Lakes Congress

Exhibitor Presentation Session Descriptions

2:30 – 2:55 p.m. Exhibitor Presentation Session I

A. Waterfront Septic Systems

Gary R. Spaulding, Certified Designer and Installer and General Manager, Wastewater Alternatives, Inc.

Come learn about the Clean Solution™ septic system, an affordable, ecologically sound alternative septic system specifically designed for New Hampshire applications.

B. Overall Lake Management

Lee Lyman, President, Lycott Environmental, Inc.

Learn how Lycott works with lake and pond associations, state and local government agencies, commercial businesses and private citizens to manage lakes and watersheds throughout New England. Lee will discuss land use, stormwater, and septic system management within watersheds and will also discuss in-lake management techniques such as aeration, dredging, benthic matting, biological controls, and herbicides.

C. Waterfront Landscaping

Hayden McLaughlin, President, Belknap Landscape Company, Inc.

Learn about the “Lakes Region’s Landscaper,” a full-service, year-round landscaping company. Hayden will discuss examples of environmentally-sensitive landscaping techniques within the shoreland buffer.

3:00 – 3:25 p.m. Exhibitor Presentation Session II

A. Lake Friendly Design and Building

Gordon W. Cormack, Cormack Construction Management, Inc.

Responsible designers and builders must be aware of and sensitive to the many elements involved in building along New Hampshire's lake shores. Navigating between suitable siting, appropriate designs and applicable laws and codes can be a delicate balancing act when also trying to meet owner goals and expectations. Gordon will speak about several projects in the Lakes Region that have given him insights into building both successful projects and enduring client relationships.

B. The Aquacleaner - Suction Harvesting and Spot Dredging Equipment

Jerry Davis, President, Universal Water Solutions Aquacleaner, Inc.

Universal Water Solutions (UWS) is leading the field in Waterfront Restoration Technology with a variety of suction harvesting and spot dredging machines. UWS offers a complete and thorough program that not only makes these machines available to you, but also offers complete training on all aspects of the process so that you can maximize the efficiency of your equipment while remaining compliant with your state’s regulations. This presentation will offer a wealth of knowledge about these types of technology so that you can further assess their potential benefits in solving your lake’s problems.

C. Volunteering for the Loon Preservation Committee

Jill Rolph, Loon Education Director, Loon Preservation Committee

Come learn about Common Loons and how you can help scientists protect this NH threatened bird species. The Loon Preservation Committee (LPC) is offering training workshops for citizens who want to help loons. LPC is training Volunteer Educators to help continue to protect this threatened species. This training workshop will teach you skills to become a Volunteer Loon Educator on your lake or pond.
